Subject: Former SW Marine Site Visit Followup

Hello,

Just wanted to say thanks again for arranging and hosting the informative site walk yesterday. We look forward to working with the Port of LA and the Source Group regarding these PCB issues at the site. I plan to be in touch again shortly (barring a potential government shutdown next week) to discuss any issues as we begin drafting a PCB Approval. The Approval will be risk-based (40 CFR 761.61(c)), which gives us some flexibility as to the cleanup level and sampling approach.

In case there was some confusion about having to resubmit the workplan, I want to mention that the September 12 notification (hard copy provided yesterday) is sufficient.

Please feel free to call me at (415) 972-3654 if you have any questions.

Thanks,
Nathan
